

Neutraphone

Panneau d'insonorisation

Caractéristiques

- Because of their unique structure, NEUTRA-PHONE® panels can be installed directly underneath ceramic tile, marble, 3/8-inch (10 mm) hardwood floors, and marquetry. NEUTRA-PHONE® lets you avoid the hassle of multi-layered assemblies.
- For renovation work, installing NEUTRA-PHONE® panels keeps floor thickness to a minimum, which reduces the adjustments required for framings, baseboards and fixed accessories.
- NEUTRA-PHONE® prevents cracked concrete flagstones from cracking ceramic tiles.
- NEUTRA-PHONE® is odourless and non-toxic.
- It keeps its shock-absorbing properties.
- It is a 100% efficient vapour-barrier and is water-resistant.
- Coefficient of heat transmission: R-2/in.

Neutra-Phone panels can be installed underneath any kind of flooring.

They come in dimensions of 2 ft x 2 ft (0,6m x 0,6m), which makes them easy to carry and install.

Our products are made of 100% recycled tires.
